

Pentokan

The key to cellular health

coralclub

Stress - an unavoidable part of modern life

It is caused by any strong excitement – both negative and positive.

Other stress factors:

Result - cell damage In the body

And this is accelerated
wear, aging, and disease.

**It all starts
with cells**

Oxidative stress

Healthy cells

Free radicals
attack

Damaged cells

Free radicals: molecular terrorists

About 1 trillion free radicals are
formed in 1 cell per day

Sodium-potassium pump

Evolutionary inconsistency

The diet of our ancestors

potassium

sodium

Modern diet

potassium

sodium

Potassium functions

- Support of acid-base balance
- Providing intercellular contacts
- Providing bioelectric activity of cells
- Maintaining neuromuscular excitability
- Participation in the regulation of heart contractions
- Maintaining water-salt balance
- Catalyst for carbohydrate and protein metabolism
- Maintaining normal blood pressure levels
- Participation in the provision of renal excretory function

Potassium deficiency

- **Fatigue, tiredness, sleepiness**
- **Apathy, mental exhaustion**
- **Hyperactivity, irritability**
- **Muscle aches**
- **Abnormal heart rhythm**
- **Chronic constipation**
- **Swelling of tissues**
- **Breathing disorder (shortness of breath)**

The daily recommended intake
of potassium -

3 500 mg

Potassium is rich in **bananas,**
honey, fish, eggs, nuts,
apricots, legumes, prunes,
raisins.

Unfortunately, most people these days don't get enough potassium in their diets.

If you are regularly engaged in **exercise, sport, or physically-demanding work**, you need more **potassium**.

PENTOKAN

ACTIVE FORMULA
(POTASSIUM + VITAMIN C + RIBOSE)

BIO-AVAILABLE FORM

EFFECTIVE REGULATION OF
INTRACELLULAR METABOLISM

coralclub

Formula

POTASSIUM

PENTOKAN – A SOURCE OF POTASSIUM
essential to maintaining
normal cellular metabolism

Due to the form of
effervescent tablets,
the **bio-availability**
of potassium reaches

97,5 %

Ribose –

monosaccharide from the pentose group
(natural carbohydrate)

Supplementing ribose
increases the production of ATP by

300 – 400%

Increases the ability
of cells to reproduce by

700%

Vitamin C

Plays an important **transport role** in the product formula, contributing to the rapid and efficient delivery of potassium into the cell.

1 minute – and it's ready!

Simply add **1 effervescent tablet**
in 150 ml of water or fruit juice.

Take 1 tablet 1-2 times daily before
or with meals.

PENTOKAN

Recommendations

Anyone who is actively involved in physical exercise

With regular consumption of coffee, chocolate, alcohol

People who often experience nervous tension, stress

With malnutrition, frequent consumption of salty foods

If you are at increased risk of developing heart problems
