ULTIMATE MAX

Vitamin and mineral
support for your body

Vitamins

Necessary for the biochemical and physiological processes that occur in the body

Ultimate Max contains 12 of the 13 existing vitamins.

Minerals

Necessary for the proper development and functioning of all organs and tissues

Ultimate Max contains 10 essential macro and micronutrients

* macronutrients

* micronutrients

What does a lack of vitamins and minerals lead to?

Bone
fragility

Weakened
immunity

Heart
arrhythmia

Early
aging

Disruption of the
reproductive and
nervous systems

Vision
deterioration

Disruption of
psychoemotional
balance

Increased
irritability

Skin
problems

Decreased
vascular tone

Modern research has revealed that more and more people around the world are not getting the required amount of vitamins and minerals.

There are too many refined foods in the modern diet. These foods contain too few nutrients.

Vegetable and fruit crops are grown on depleted soils of agricultural land. The variety of soil mineral composition decreases every year.

Poor ecology, bad habits, stress, and past diseases can aggravate vitamin and mineral deficiencies.

D3

~20%

Vitamin D deficiency is a global problem

of the population lacks vitamin B12

Residents of industrialized countries suffer from its deficit

According to the latest research, it is found in all ethnic groups, and even in countries with year-round sunlight.

Zn

Residents of Europe, the USA, Canada, and Russia receive less than 15% of the physiological need for zinc.

17.3% of the world's population is at risk of suboptimal consumption of this mineral.

Se

~ 1 billion people are deficient in selenium

I

~ 2 billion people suffer from iodine deficiency

Ultimate Max

The next generation of vitamin and mineral support.

Ultimate Max

Ultimate Max is:

Modern, bioavailable
nutrients

12
vitamins

10
minerals

Vitamin-like substances choline,
inositol, and p-aminobenzoic acid

Balanced
composition

Complex
of herbal extracts

Bioflavonoid
Complex

Vegetable capsule
instead of a pill

Ultimate Max

10 vitamins and minerals in modern and bioavailable forms

Increased content of 11 components

Two new plant complexes

Vegetable capsule instead of a pill

10 vitamins and minerals have been updated to more modern, bioavailable forms. **What has changed?**

C
Vitamin

In a buffered form suitable for sensitive GI tracts.

B9
Vitamin

In the most active folate form of patented Metafolin® calcium L-methylfolate instead of the regular folate form.

B12
Vitamin

In the form of methylcobalamin instead of cyanocobalamin.

A
Vitamin

Represented by beta-carotene, a provitamin*.

B6
Vitamin

In the form of pyridoxal phosphate instead of pyridoxine hydrochloride.

Magnesium

In the highly bioavailable form of magnesium citrate instead of magnesium oxide.

Potassium

In the form of potassium citrate, which has a more preferable effect on the body than potassium chloride.

Zinc

In the form of organic zinc citrate salt instead of zinc gluconate.

Nutrients that have been increased:

- **Selenium**

content increased by 300%

- **Chromium**

content increased by 250%

- **Zinc**

content increased by 200%

- **Iodine**

content increased by 150%

- **Copper**

content increased by 150%

- **Inositol and Choline**

The content of the vitamin-like substances inositol and choline has been increased **by 500%**.

These are important components for supporting proper brain function.

- **PABA (para-aminobenzoic acid)**

The content of PABA (para-aminobenzoic acid) has been increased **by 1,000%**.

This is an important component for maintaining healthy skin, hair, nails, and digestion. The synthesis of PABA can be disrupted as a result of disorders in the GI tract.

- **Biotin (vitamin B7)**

The content of biotin (vitamin B7) has been increased **by 250%**.

Biotin is an important component for the health of skin, hair, nails and is a participant in protein, carbohydrate, and lipid metabolism.

Choline

- Improves cognitive function and emotional well-being
- Protects the liver
- Provides a steady supply of glucose to cells
- Maintains blood flow
- Supports brain function
- Regulates insulin levels

Inositol

- Is a structural component of cell membranes
- Helps maintain normal blood sugar levels

P-aminobenzoic acid

- Essential for the creation and maintenance of new cells
- Supports bowel & liver function

New groups of biologically active substances:

- Complex of bioflavonoids from citrus and berry crops
- Herbal mixture of vegetables and berries (hesperidin, blueberry extract, acai and tomato fruits)

These are modern, actively studied groups of phytonutrients with high biological activity, demonstrating various positive effects on the human body: antioxidant protection of cells, improved blood circulation, strengthening of blood vessels.

Ultimate Max helps:

Normalize the vitamin
and mineral balance in the body

Strengthen the
immune system

Prolong active
longevity

Increase vitality and
performance
