APRICOTS - A RICH, NATURAL SOURCE OF VITAMINS, MINERALS, AND FIBER

"SHALAH"

Apricots warmed by the sun and grown in the pristine fields of Armenia

Shalah apricots grow in the Ararat Valley of Armenia. In the foothills of Mount Gegham to the southwest of Lake Sevan, apricot fields are irrigated by the crystal clear waters of the Araks River and its tributaries.

It is here that large, juicy apricots with notes of pineapple grow.

ALL THE BENEFITS OF “SHALAH” APRICOTS IN THE NEW PRODUCT ABRICOTAB C

To preserve the fruit's valuable nutrients and their properties,
apricots are prepared by **freeze-drying**:

Step 1:

Apricots are frozen at very low temperatures

Step 2:

They are placed in a vacuum, where the moisture is sublimated* and its content in the apricot is reduced to 1-2%

Step 3:

The end product preserves the valuable properties of fresh apricots

The lyophilized* (or freeze-dried) powder of apricot fruits is rich in valuable nutrients.

1

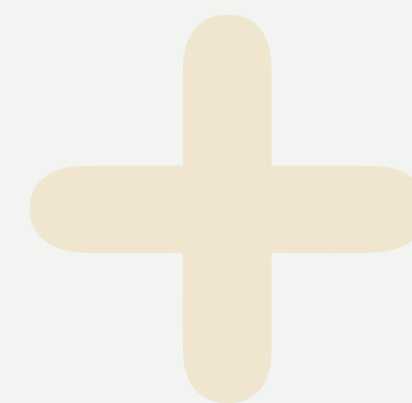

CAROTENE
antioxidant support

2

CELLULOSE
digestive comfort

3

POTASSIUM
energy and cardiovascular health

APRICOTS

+

VITAMIN C

=

**AN OPTIMAL FORMULA FOR
STRENGTHENING THE BODY**

APRICOTAB C INCLUDES VITAMIN C:

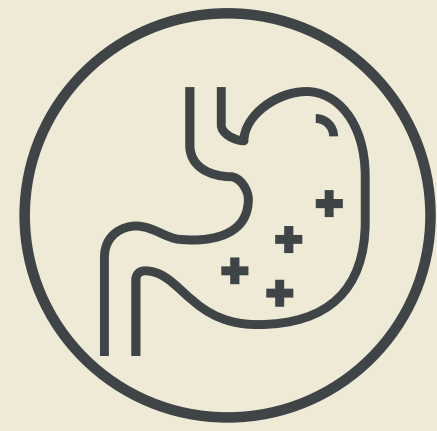

SUPPORTS
IMMUNITY

FACILITATES ACTIVE
LONGEVITY

PROMOTES THE PRESERVATION OF
VITAMIN E

IMPROVES THE
ABSORPTION OF IRON

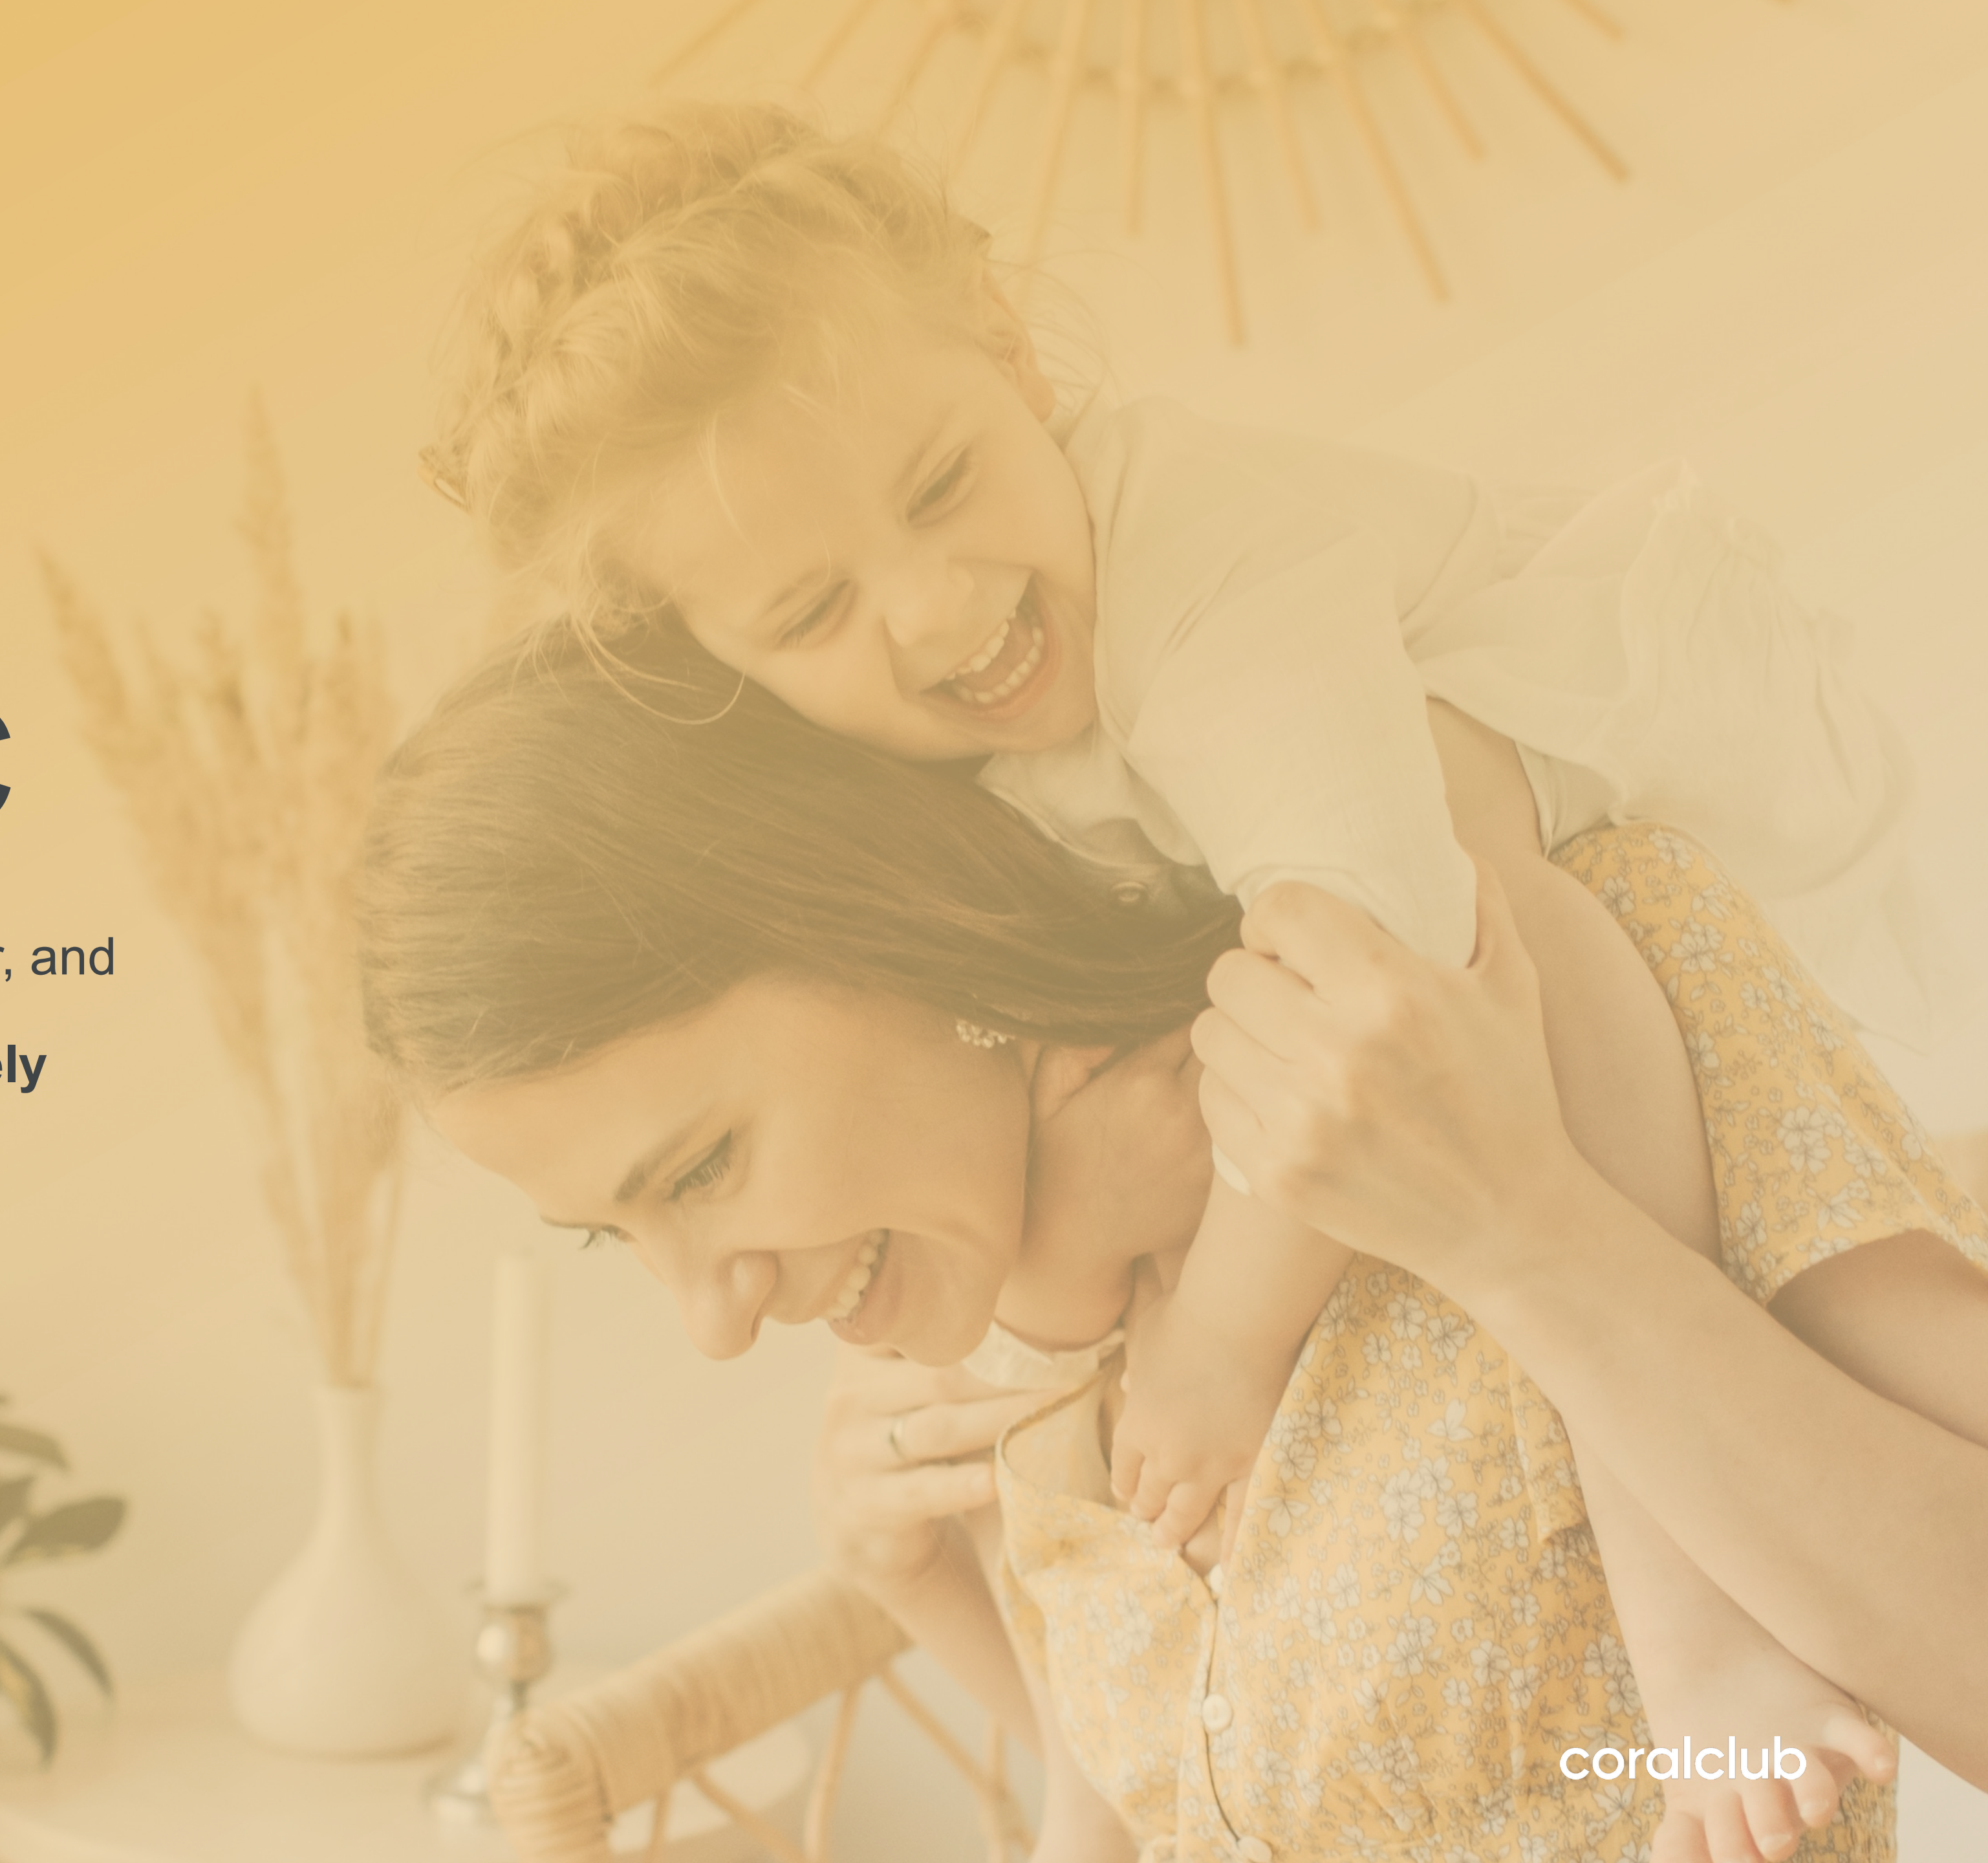

ABRICOTAB C
