O!Mega-3

TG

Get the
rhythm you
deserve

Omega-3 is the collective name for a group of polyunsaturated fatty acids (PUFAs)

What do we know about them?

01

They enter the body mainly through food sources like:

- Fish
- Vegetable and flaxseed oils
- Nuts (especially walnuts), flax seeds
- Leafy vegetables

02

Affect the condition and proper organ functions as well as systems such as:

- Cardiovascular
- Immune
- Nervous
- Musculoskeletal
- Skin

03

They are the healthiest of the fatty acids especially:

- Eicosapentaenoic acid (EPA)
- Docosahexaenoic Acid (DHA)

EPA and DHA Omega-3:

May help stabilize blood pressure^[1,2]

Promote visual organ performance^[3]

Support intellectual development^[4]

Normalize emotional stability^[4]

Promote a stronger immunity system^[5]

Help support your skin^[6]

In most countries people don't consume enough EPA and DHA ^[7]

Studies support that deficiency of EPA and DHA can lead to:

-  Impaired vision and dry eyes
-  Lack of cognitive support and focus
-  Some weakening of immune system functions
-  Skin issues and premature aging appearance

Most Western diets lack sufficient amounts of EPA and DHA, which are vital to our health. This deficiency is concerning, as we may not even be aware of it, because we consume food that is:

- overabundant in saturated animal fats

- high in trans fats

- processed

- full of sugar

Even those who eat fish regularly may be deficient in EPA and DHA

Only cold-water saltwater fish

is rich in EPA and DHA

- herring
- salmon
- cod
- mackerel
- tuna
- sardines
- anchovies

Artificially farmed fish typically contain low levels of EPA and DHA due to inadequate amounts of omega-3 in industrial feeds.

A plunge into the deep world of the Omega...

In order to maximize the benefits of EPA and DHA, a few methods have been developed to enhance the CONCENTRATION of omega-3 PUFAs.

How to obtain high concentrations of EPA and DHA

Fish fat (also contains DHA in its natural triglyceride form)

EPA and DHA in ethyl ester form

EPA and DHA in triglyceride form is restored

Raw fish

The transesterification process

Helps separate EPA and DHA from other fatty acids and increases their concentration in the product.

Re-esterification process

Restores the form of EPA and DHA close to their natural form, and further increases their concentration in the product.

EPA and DHA

15-20%

>60%

Different forms of EPA and DHA compounds:

Natural triglyceride form

can be found in fish fat

A combination of 3 molecules from different fatty acids

Ethyl ester form
has long been used in dietary supplements

A compound with 1 PUFA molecule

Reconstituted triglyceride form

has gained popularity in recent years

A compound of 3 PUFA* molecules
*predominantly

Restoring the triglyceride form of Omega-3 making it more structurally similar to its natural form

Thus, it is more recognizable to the body and is easier for digestive enzymes to process.

This is particularly significant for individuals who are beginning to take Omega-3 PUFA supplements for the first time

By blending innovation with the finest health care practices, we have developed O!Mega-3 TG - a product that offers efficient support for heart, vascular, and vision health.

O!Mega-3

TG

Active Ingredients in a single capsule

Fish oil - 1000
mg

OMEGA-3 — 650 mg,
including:

EPA — 360 mg

*As in ~92 grams of free-range
steamed salmon*

DHA — 240
mg

*As in ~ 201 grams of free-range
steamed salmon*

Benefits of O!Mega-3 TG: restored triglyceride form

Increased concentration of
EPA and DHA

A form close to the one
found in fish fat

O!Mega-3 TG: The riches of the Pacific and Atlantic Oceans

The fish oil used to produce this product is extracted from cold-water ocean fish species, such as:

- Anchovies
- Sardines
- Mackerel
- Tuna

O!Mega-3 TG production from sunny Spain: high-quality and safe

01

This product is manufactured in a production facility that adheres to international GMP standards.

0

The raw materials are processed using Flutex™ technology, which does not require the use of toxic organic solvents or high temperatures.

2

1 capsule of O!Mega-3
TG
3 times a day with
meals
and your body will easily
get into a healthy rhythm!

O!Mega-3 TG

Supports heart, vascular, and vision health

Helps strengthen the immune and nervous systems

Promotes healthier skin condition

Helps support a healthier overall lifestyle

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

O!Mega-3 TG is perfect for those who want:

To improve stamina and performance

To better cope with high levels of mental stress

To maintain a healthy heart

and blood vessels
To preserve sharp vision

To take care of their nervous system

To provide added support to their immune system during cold and flu seasons

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

O!Mega-3 TG

- ① For heart, vascular and vision health
- ② High concentration of Omega-3 PUFAs in each capsule
- ③ Suitable for children ages 14 and up

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Omega 3/60 VS. O!Mega-3 TG

	O!Mega-3 TG	Omega 3/60
Omega-3 PUFA concentration	<p>Total omega-3 PUFAs: 650 mg of which:</p> <ul style="list-style-type: none"> • 360 mg EPA (eicosapentaenoic acid) • 240 mg DHA (docosahexaenoic acid) 	<p>Total omega-3 PUFAs: 600 mg of which:</p> <ul style="list-style-type: none"> • 300 mg EPA (eicosapentaenoic acid) • 200 mg DHA (docosahexaenoic acid)
Compound form	Reconstituted triglyceride (re-esterified TG)	Ethyl ester (EE)
Patented production technologies		
Manufacturer	Rioja Nature Pharma, S.L (Spain)	United Pharma LLC (USA)

O!Mega-3 TG

- ① **O!Mega-3 TG has a higher concentration** of omega-3 PUFAs (+ 8.3%)
- ② **O!Mega-3 TG is a contemporary** version of the omega-3 PUFA compound, closely resembling its natural structure.
- ③ **O!Mega-3 TG is produced using Flutex technology**, which gently and efficiently extracts fat from fish without the use of harmful organic solvents or high temperatures
- ④ **O!Mega-3 TG is produced in a cutting-edge facility** located in Spain, which adheres to international GMP standards

Enhancing Whole Family Health with Omega-3

For a well-rounded growth of your child, you may want to consider supplementing their diet with DHA+D3 Smart Chews, which are:

-  360 mg of DHA and 12 mg of vitamin D3 in one tasty chew
-  Made with ConCordix® technology for maximum bioavailability
-  Suitable for children 4 years or older

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
